	Natural	61066	217×200×56	8.54×7.87×2.20	200	25	8

●Material/Pulp ●Film/PLA

## Environmentally friendly paper container series

The natural texture of paper enhances the attractiveness of food by specialty and can be widely used by high-end stores. The series is an excellent alternative to styrofoam and plastic containers. Even with extra saucy foods, the inner PLA lining allows for a full range of functionality. Our paper container series is plastic-free and derives materials comparable to plastic. In addition, our paper container series meets ASTM D6400 standards and composts in industrial composting facilities.

## Pulp mold container

The entire series is made of environmentally friendly pulp mold (a molded paper pulp product) and is due to the inner PLA lining. In addition, due to the special molding process, the surface has a smooth finish while retaining the texture of the paper.

A molded paper container with the same compartments as a general lunch box (Japanese-style lunch box).

Item	Color	61068	L×W×H (mm)	L×W×H (inch)	CTN	PCS	PKT
KM-56	White	61068	237×200×42	9.33×7.87×1.65	300	25	12
